

## DIGITAL I.D. AND CASHLESS CURRENCY—ON-DECK ?

by: Bill Watson

Discussions and growing economic forces are becoming more serious as the years go by—Digital IDS is intended to be mandated if you expect to participate in the social order. The time seems to be “*creeping*” upon us that will require all citizens to be identifiable via digital means by the government. Bill Gates and his *Melinda Gates Foundation* has partnered with the *Rockefeller Foundation* to accelerate a digital ID payment program with data sharing rollouts in fifty countries. That’s right—50 countries! And Gates has already had an audience with President Trump!

This is all being done under the umbrella of a “***Digital Public Infrastructure***” (DPI) with a goal of having it in place by 2028. Its called the 50-in-5 campaign, which is an agenda concocted by a group of *unelected globalists* to expedite technocratic control through the use of digital ID, CBDC [*Central Bank Digital Currency*] and an enormous data sharing platform. The United Nations, as is the IMF, are also involved, giving their full support.

This “structured process” is designed to secure and inter-operate a network of components that include digital payments (cashless), Digital ID’s, and data exchange, or sharing systems for tracking. This will all be essential for participating in the commerce of the social order that this new, upcoming digital era, will require.

It’s being promoted as the next best thing since “slice bread and Chevrolet.” This propagation has already started as far back as November 8th, 2023 with a *VIRTUAL* launch of the program. They have been testing it since then, working out the glitches for a smooth transition to *REAL TIME* by 2028.

The “propaganda” goes along the lines of promoting it for “*financial inclusion, convenience, improved healthcare, and green progress. DPI is an all inclusive phrase applied to a looming technocratic governance system powered by three foundational components: digital ID, digital payments like Central Bank Digital Currencies (CBDC) [cashless transactions], and massive data sharing.*” {Ref. *The Sociable*}

India’s experience with DPI spotlights its *transformative potential*. Consider the fact that eight billion transactions, worth about \$200 billion dollars was exchanged, involving about 300 million people that included 50 million merchants. This is an incredible accomplishment for a country that conducted 90% of all transactions in cash a few years ago. So, this process has already begun, making some real practical money saving progress.

All this goes to show there is a “legitimate push” to advance a transition to a *fully digital system*. The current USA President, Donald Trump is also very “pro-crypto!” Though Bitcoin and other crypto currencies are questionable as to their longevity, the

potential of crypto currencies illustrate the principle of how a digitized currency would work. Obviously, in due time with the idea of *Central Banking Digital Currencies*, it would appear this is how a “*central control system*” could occur. But, here’s the point: the technology is here and how it completely manifests remains to be seen.

However, in Revelation we are told: “And he (Beast and False Prophet) causes all, both small and great, rich and poor, free and bond, to receive (*deliver*) a mark (*etching, scratch, stamp*), in their right hand, or in their foreheads: And no man might buy or sell, save he that had the mark (*etching, scratch, stamp*), or the number of his name” (Rev. 13:16-17).

The technology that is coming that will generate these results, will be necessary to have if you want to buy, or sell things. If you intend to participate in the commerce of the hegemony this etching, scratch, or stamp will be mandated for you to have. Without it you will not be able to function within the society at large.

And yet, God is adamant for all those that want to be in His kingdom, “**not**” to receive this etching. Notice: “...If any man worship the beast and his image, and receive his mark in his forehead, or in his hand, the same shall drink of the wine of the wrath of God, which is poured out without mixture into the cup of his indication; and shall be tormented with fire and brimstone in the presence of the holy angels, and in the presence of the Lamb: And the smoke of their torment ascends up for ever and ever: and they have no rest day nor night, who worship the beast and his image, and whosoever receives the mark [*the etching, stamp, or scratch*] of his name” (Rev. 14:9-11).

So, going forward it is critical we stay vigilant about the development of these technologies and legislation that will most certainly come to fruition in the future, as we move closer to a *digital and cashless society*. Because a lot of this will affect us personally, as it becomes part of the *globalist’s protocols of life*, around the world.

*Below, is a sermon link that will expand on this blog and provide additional perspective on this subject. Take some time to watch it.*

### ***DEFINING THE END GAME (The Great Reset)***
