

Considerations For The Feast of Trumpets

Interestingly enough, when you consider the Holy Days of God, it doesn't take long before one recognizes they are describing actual "sequential" events. Upon realizing this, most of us would agree, the Spring Holy Days are all fulfilled, while the Fall Holy Days remain yet to occur.

With a focus on the Fall Holy Days, specifically the commencement of Rosh Hashanah, a.k.a. *The Feast of Trumpets*, we understand the imaginary is that of war! The take away we get from the Fall Holy Days is God's wrath is coming when Christ returns, and it will result in restraining Satan's influence for a thousand years for the short term—but, after the second resurrection, he will permanently be separated from God's Kingdom. This is Good News—it is central to the Gospel segment of just what the Kingdom of God is really all about.

The Bible is filled with all kinds of information about the End Times and what leads up to them. The Gospels, Prophets, and the book of Revelation all describe events that are key to recognizing certain sequences of events that will cause specific conditions, which will provide circumstances to accommodate the development of particular prophecies already written. One of those developments is the emergence of a Globalist Empire that will rule and influence most of the world—the Bible calls it *Mystery Babylon The Great* {Rev. 17:5}, or simply, "The Beast!"

Those "Watchers on The Wall" (Ezek. 33) that are awake are presently beginning to see the formation of a growing Global Tyranny {Dan. 7:23}! There are repeated patterns that find their way into the development of social structures that begin to generate the cycles that lead to this Totalitarian Collectivism. It's common to observe expanded government, socialist ideologies that amalgamate large corporations to be used for government control; like censoring, and propaganda! It's the proverbial: "abandonment of individual merit for the sake of the state and the "greater good," Marxism—not just economic, but also cultural—and finally, the adoption of futurism." (Ref. Fight The Power; by: Brandon Smith—Art. attached below)

This is what we're currently up against in the United States! Since the Pandemic and so much disinformation and misinformation about both the virus and "jab," illustrated this tactic very clearly over the duration of time the Pandemic was underway. Meta CEO and Facebook creator, Mark Zuckerberg, has finally admitted there were covert "behind the scene" pressures put upon them by the present Biden Administration to censor any COVID-19 technical information that contradicted the government narrative—This is now a known fact!

The admission of rigging algorithms to bury search results, shadow ban technical papers written by contrarian Doctors, or simply canceling people's accounts, were all tactics used by Facebook, YouTube and other Social Medias. The information disclosed since Elon Musk bought Twitter (Now known as "X") confirmed, they too were part of this "hiding" of information, contrary to the government narrative; but now, this same information is presently, making it's way back into the Mainstream Media as substantiated facts that what originally was portrayed as a safe and effective "Jab," fell short of their expectations!

So, whether it's the U.K. Brazil, the E.U., or the USA and Canada, limiting "freedom of speech" is the first step in the globalist's strategy. And the **main target** is the United States! These Marxists Elites know the USA is a major obstacle in preventing them to accomplish their Collective State (Rev. 17:9-14). Make no mistake, they will not stop in their attempts to neutralize and disarm the United States of America. When (**not if**) that happens we will enter into the Times of The Gentiles (Luke 21:24 & Dan 11:40-43 & 8:23-25).
