Many of you might be unaware of the major BRICS Meeting that took place in Kazan, Russia. This meeting took place between October 22 thru October 24th. It was scheduled to address certain issues that concern those nations, mostly outside of NATO and of which, included some U.N. and I.M.F. alliances for leveraging future cooperative efforts in the areas of finance, an Interbank Cooperation Mechanism (ICM), immunization development by the BRICS R & D VACCINE CENTER and some additional issues that were part of the agenda.

This group of nations that originally was made up of **Brazil, Russia, India, China, and South Africa (BRICS)**; has now expanded to as many as 18 new nation states. They are: Algeria, Belarus, Bolivia, Cuba, Indonesia, Kazakhstan, Malaysia, Nigeria, Thailand, Turkey, Uganda, Uzbekistan, Vietnam, Argentina, Egypt, Ethiopia, Iran, and the **United Arab Emirates**. Venezuela was denied—Brazil vetoed its admission. This was primarily due to the “*suspicion*” that voter fraud was involved that resulted in the election of Nicolas Maduro. A very similar “*suspicion*” as to the voting circumstances surrounding the 2020 USA election that resulted in the current US Presidential Administration.

However, this coalition, though not a formal organization, more like a loose “bloc” of non-Western nations that share in the common goals of the original BRICS objective; which is, to provide an alternative “bloc” (*many that are considered communistic*) to compete with what they view as Western Dominance. It reflects 30%+ of the world's economy and just short of half of earth's population.

This “bloc” of nations is positioned to exert influence around the world to guide and steer conflicts, trends in governance, financial management and/or control globally and includes an R & D center for the development of vaccines. In-other-words, *another globalist movement* that is working in alliance with the U.N. and is aspiring to become the dominant force, with it's primary target—to *knock off the US dollar as the world's Reserve Currency*.

Clearly, this informal “bloc” of nations that are primarily made up of developing nations, will have the potential of some enormous growth. The expansion potential in the area's of diplomatic policy, new financial institutions, and ultimately a currency, or new currency system policy that will make them less dependent on the US Dollar—this is, and has the *possibilities* of becoming a real threat to the United States' geopolitical influence and financial strength around the world.

Undoubtably, there are some obstacles that need to be worked out. It's not all smooth going, but there is some serious effort being exerted to challenge the western N.A.T.O. and E. U. and North American nations. And China, Russia, and Iran, with North Korea included, are a *new axis of power* that have become the driving *influential force* behind this movement and it's developing presence in and around the globe!

The links below will add some insight to your understanding and provide additional context as to the extent of this growing threat and how globalism is anything, but dead in the water! Anyone that try's to tell you globalism is nothing more than a “*gas-lighting conspiracy*” doesn't know what they're talking about. All they're doing is showing you how uninformed they are about these gigantically colossal, geopolitical rearrangements that are growing all around us!

Take some time and hit on the links below. They are designed to be informative and edifying as you view these prophetic developments from the “Wall you are Watching” from. Remember,

stay prepared and take some time to discuss and warn *your network of friends and family* of the dangers and threats that lurk all around us! Sadly, America is the “bulls-eye” to collapse—**that is what the globalist's objective is—to eliminate, or at least paralyze the United States!!**
